

Role

(Junior) Full Stack Developer Magento / PHP (f/m/d) in Frankfurt am Main

We are looking for a passionate developer to join us on our mission to revolutionize the way people buy products. You will be working on the further development and optimization of our own WebGL based 3D customization experience for customized helmets on helmade.com as well as our B2B product ,Customization as a Service (CaaS)' madeone.de for clients from various industries. You are flexible to work on front and backend systems and you are willing to bring in your expertise working on more complex web solutions, then let's talk about our custom future.

Tasks

- Be responsible for maintaining, expanding and scaling our helmade.com experience
- Front & backend development for Magento 1 and Magento 2
- Development of new and existing customized Magento functionalities incl. seamless integration of external solutions (3D product configurator)
- Creation of new user-friendly Magento templates in close collaboration with our design team
- Planning and execution of new CaaS projects for clients from various industries
- Maintenance of our existing Magento installations (security updates, stage, back-ups etc.)
- Create and maintain software documentation
- Stay plugged into emerging technologies/industry trends and apply them into your work
- Write well designed, testable, efficient code by using best software development practices
- Create website layout/user interfaces by using standard HTML/CSS practices
- Further develop ecommerce shop systems (Magento focused)
- Integrate data from various back-end services and databases
- Gather and refine specifications and requirements based on technical needs

Requirements

- Work experiences as developer or completed apprenticeship
- Good experiences in developing Magento extensions (or similar shop systems)
- Good experiences in Magento setup & maintenance (or similar shop systems)
- Good experience in PHP, HTML5, XML, MySQL, CSS3, jQuery and (ideally) WebGL
- Passion and a good sense for excellent web design and a state-of-the-art UX
- Oriented towards business results
- Proficient using Git & Photoshop (no show stopper)
- Problem solving mentality
- Self-starter with an innate curiosity and the commitment to test, learn, adapt and be agile in a constantly evolving environment
- Active team player
- Passion for madeone's mission to revolutionize the way people buy products

Our work environment

madeone is (still) a small but solid and experienced start-up organization. We are a growth company that looks for strong individuals to grow with it. madeone offers a competitive salary package, casual work environment, a diverse and inclusive culture, and the ideal platform for professional development. At madeone, every employee is a creative and business minded person. We unite diverse perspectives - digital designers, printing technologist and painters, coders and customer service experts - to share knowledge of customized experiences. Our space is not a creative office, it is not a hands-on custom workshop. It's both. We grow our teams steadily to make sure we are able to bring our mission to life.

About us

The madeone concept was born out of our own professional experiences with successful mass customization businesses at the Global Sports Brand Nike and our own start-up business [helmade.com](https://www.helmade.com) which has put a stamp on the world of customization experiences in a highly complex industry. Since 2015 the helmade customization service is revolutionizing the helmet industry by allowing helmet manufacturers to offer customized products to their customers. As a consequence we have brought to life madeone as our overarching company setup with helmade being our first portfolio brand and running business case. To us the future of products and services is custom. We are a team of fast living minds with true passion for design and individuality. madeone represents and offers ‚Customization as a Service (CaaS)‘. We are passionate about this business potential and believe all companies and brands should have the possibility to add a customization service to their existing product lines. We are no agency. We are offering our clients not only a one-of-a-kind frontend 3D configurator technology but we are positioning ourselves as a B2B or potentially B2C fulfillment partner for handling our clients' customization business. We invest in our teams and digital experiences, exciting new business models, production methods and inspiring concepts that drive the future of customization.

Contact

We are looking forward to your application including your CV and your salary expectations via mail to contact@madeone.de.
